John and David
One Paper and pen
10 AM
John - Paper
David - Pen
John is having paper right now(paper is locked)
David is having pen right now(pen is locked)
John trying to take pen - locked by david
David trying to take paper - locked by John

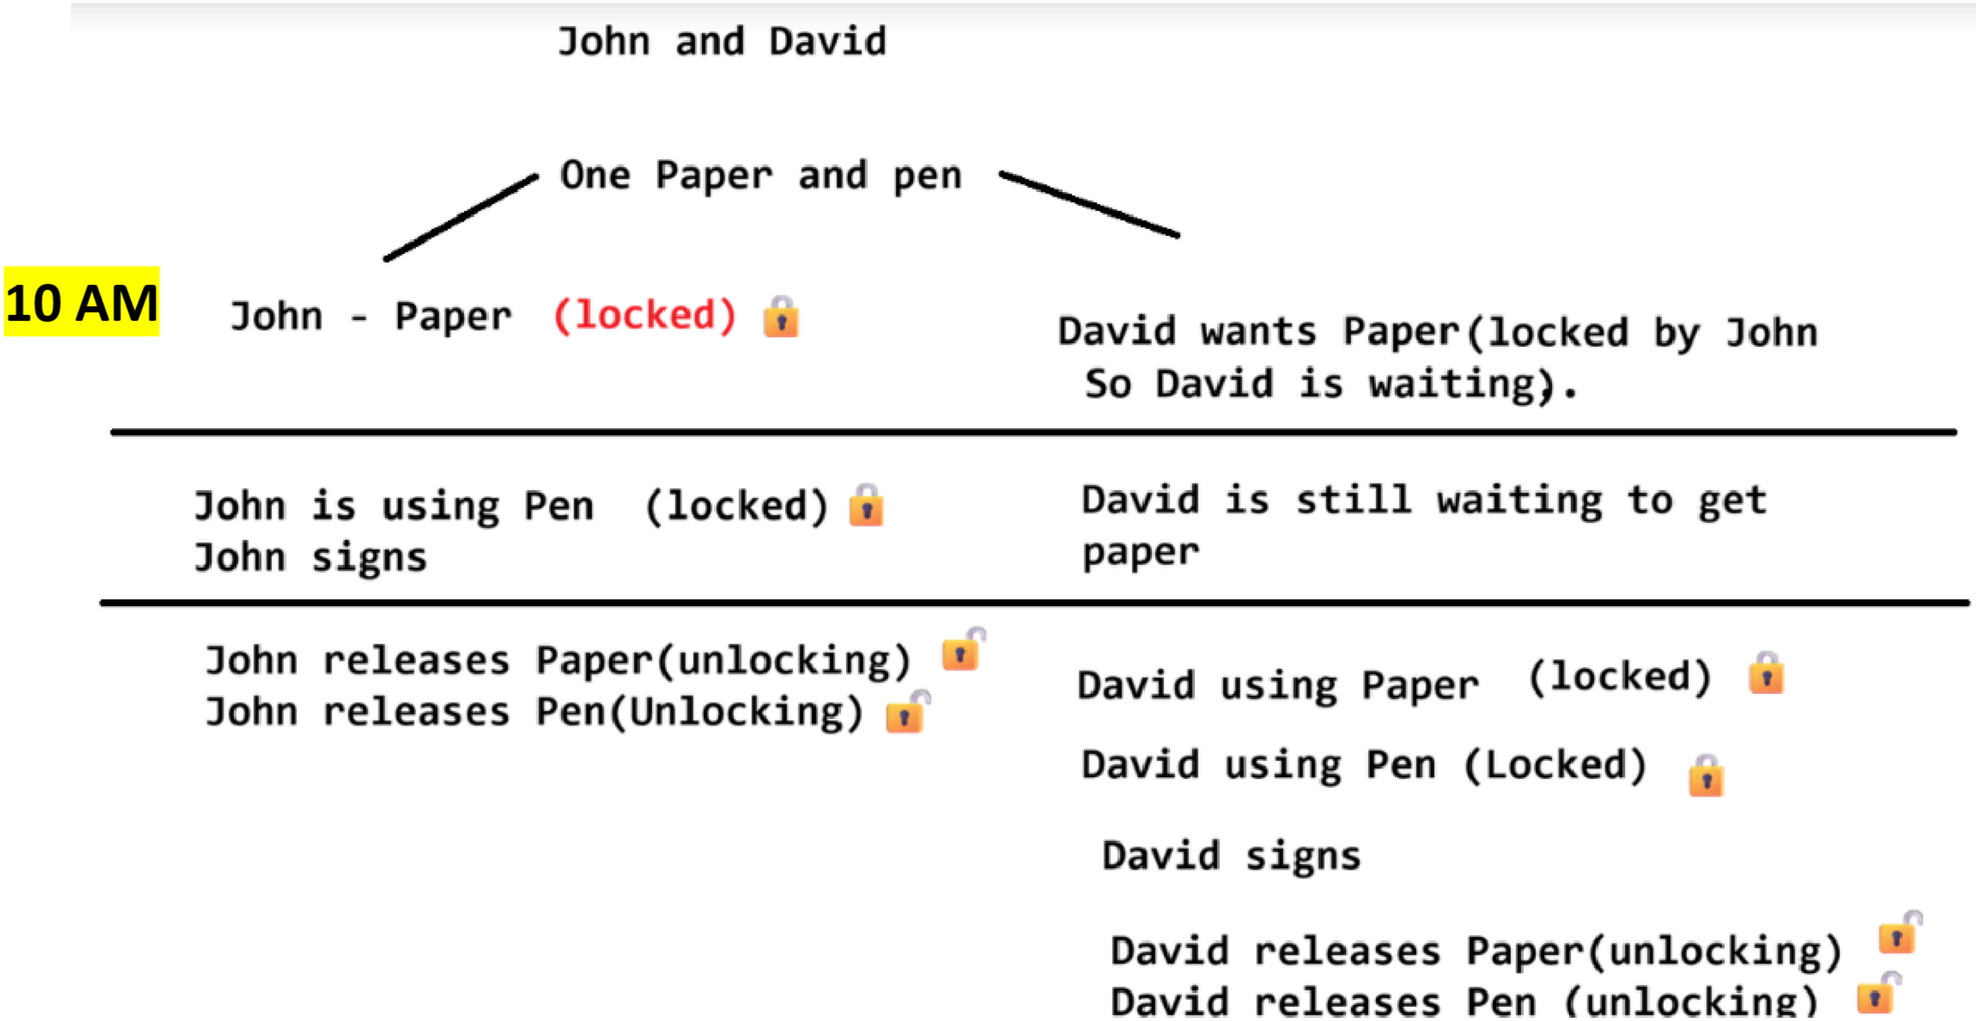

Deadlock

Deadlock is a situation where two or more threads wait for each other forever.

Each thread holds one resource lock and waits for another resource.

As a result, neither thread can continue.

How we can prevent this dead lock

THANK YOU
