Aggregation and Composition

Trainer's Name: Ms. Shanmuga Priya

Aggregation

```
class Company  - Owner class
{
   Employee employee;  -  Dependent class
}
```

Company Has a Employee

Dependent class life is not completely tied to Owner class.

Weak Has a relationship

Dependent class functioning is not completely based on the owner class.

```
class Car - Owner class
{
      Engine engine; --dependent class
}

class Human - Owner class
{
       Hear heart; - dependent class
}
```

Heart starts functioning(logically) only when it is in human body.
Engine starts functioning(logically) only when it is in a Car.
Dependent class starts functioning only when it is in a owner class.

Strong Has a relationship

THANK YOU
