Overriding toString method

```
package com.cait.tostring;

class Employee
{

    int empId;
    String name;

    Employee(int empId, String name) {
        this.empId = empId;
        this.name = name;
    }

    /*
       public String toString() {
        return getClass().getName() + "@" +
Integer.toHexString(hashCode());
    }
     */
    @Override
    public String toString() {
        return "Employee [empId=" + empId + ", name=" +
name + "]";
    }

}

public class EmployeeMain {

    public static void main(String[] args) {
       String name = "Abi";

        Employee employee = new Employee(101, "David");

        Object object;
        System.out.println(employee);

        System.out.println(name);
```

```
    }
}
```

Overriding equals method

```
package com.cait.equals;

class Employee
{
     int id;
     String name;

     public Employee(){}

     public Employee(int id, String name)
     {
          this.id= id;
          this.name =name;
     }

  //employee1     .equals(employee2)
public boolean equals(Object object) //object = employee2
{

          //employee2.getClass() == employee1.getClass()
if (object.getClass() == this.getClass())
{
      System.out.println("printing object.getClass() : " + object.getClass());
      System.out.println("printing this.getClass() : " + this.getClass());

       Employee employee2 = (Employee) object;//employee

                           //employee1.id == employee2.id
      boolean result = (this.id == employee2.id) &&
                               //employee1.name.equals(employee2.name)
                          (this.name.equals(employee2.name));

              return result;
 }
else
{
 return false;
}

}

}
```

```
public class EmployeeMain
{

        public static void main(String[] args)
         {
         Object object = new Object();

          Employee employee1 = new Employee(102, "John");
         Employee employee2 = new Employee(102, "John");

System.out.println("employee1.equals(employee2) is  " +
employee1.equals(employee2));

        }

}
```
